

OLUTAYO SOLANA

Product Manager | Payments, Banking, Data and API Products

Dublin, Ireland | 0899859392 | demisolana24@gmail.com | linkedin.com/in/olutayosolana

SUMMARY

Product manager with three years shipping fintech products across African and European-facing markets: mobile banking apps across four Scrum teams, a Kafka and ML credit platform for five banks, about 30 third-party API integrations specified, and launches in three new markets. Results include 20% higher engagement, 11% lower churn and 15% higher satisfaction. Based in Dublin, open to product roles and contracts, remote or on-site.

EXPERIENCE

Product Owner, Interswitch Ltd

May 2022 – Aug 2024

African digital payments company; reports 190K+ active businesses transacting daily and \$24B+ annual transaction value

- Defined requirements and integration specs for ~30 third-party REST/JSON APIs (payloads, workflows, authentication, webhooks, acceptance criteria, Postman testing) and wrote technical tickets with field mappings and edge cases; read API documentation and worked with JSON and XML payloads.
- Led ML and analytics engineers on a big data analytics product (Apache Kafka data pipelines, ETL, data warehouse, data quality) with ML models for personalised credit checks, deployed to 5 banking clients; worked on cloud platforms.
- Drove the experimentation practice as a regular cadence: hypotheses, A/B tests and product experiments in Mixpanel and Amplitude, instrumented with Google Analytics and Firebase; built funnel and cohort analysis and KPI reporting.
- Partnered with Risk/Compliance, Security, Fraud, Sales, Marketing and Customer Success on launches, release readiness, dependencies, risks and regulatory requirements; managed third-party vendors and made build-vs-buy decisions.
- Owned product strategy, roadmap prioritisation and end-to-end delivery across 4 Scrum teams: 20% higher engagement, 11% lower churn, 15% higher user satisfaction, measured with KPIs, customer feedback and usage data.

Product Manager, Demand, OmniBiz Africa

Oct 2021 – Apr 2022

B2B FMCG commerce platform serving 90K+ retailers

- Led internationalisation into **Ghana, Côte d'Ivoire and Kenya**: requirements, milestones, dependencies, UAT, business readiness and production releases.
- Mapped and automated manual workflows, saving ~40 hours per week; grew Monthly Active Users 8.5% through user-flow optimisation and activation work.
- Cut churn ~8% through competitor and market analysis and 15+ user interviews; built an inventory-management and bookkeeping MVP used by ~2,000 users.

SKILLS

Product: roadmaps, prioritisation, MVPs, experimentation and A/B testing, go-to-market, user research, UAT, API requirements, digital payments

Technical and data: REST, JSON, Apache Kafka, ETL, data pipelines, machine learning, cloud platforms, Power BI, Postman

Ways of working: stakeholder management, cross-functional collaboration, Scrum, Kanban, release planning, Jira, Confluence, Azure DevOps, written and verbal communication

EDUCATION

MSc IT Enabled Innovation

Sep 2026

National University of Ireland Maynooth

Bachelor of Science (Hons), Management Technology (Project Management Technology)

Nov 2019

Bells University of Technology, Nigeria. Top 7 in class; Departmental Financial Secretary

CERTIFICATIONS

Product Manager Certificate (Product School) · Data Product Manager (Udacity) · Azure AI Fundamentals (Microsoft) · IBM Data Science (Coursera) · Scrum Fundamentals (Scrum Alliance) · Coding for Managers (Product School)

PROJECTS

- Recommendation system for e-commerce: product-managed and deployed a recommendation engine end to end, from problem framing and data discovery to launch. Matched shoppers to relevant items across a large catalog to improve search and feed relevance, with personalised nudges and reactivation to bring shoppers back, and defined the engagement KPIs and A/B tests to measure it.
- Satya, AI accounting software: conceived and shaped an AI-powered accounting product, owning the vision, requirements, MVP scope and roadmap. Applied machine learning and LLM applications to automate bookkeeping and financial reporting for both finance operations (FinOps) teams and non-accountants.
